MILES SMITH LIMITED IS AUTHORISED AND REGULATED BY THE FINANCIAL CONDUCT AUTHORITY FCA NO. 311273

MILES SMITH IS PLEASED TO INTRODUCE HAZ-INSURE, A NEW SCHEME FOR COMPANIES INVOLVED IN THE CARRIAGE AND HANDLING OF HAZARDOUS MATERIALS AND PRODUCTS

This is a sector which demands careful consideration when addressing risk management and insurance needs. Standard insurance policies will often leave gaps in cover for your clients and potential E & O issues for brokers.

Higher limits of indemnity are required for motor, general third party and environmental risks. Gaps between these covers often go unidentified until a loss occurs, for example, the loading and unloading of hazardous materials from vehicles, off road provisions and cross contamination at delivery stage to name but a few.

Insuring hazardous goods is a complex business and heavily regulated. Miles Smith has made it simple with our new Haz-Insure Scheme, irrespective of whether your clients manufacture, store or transport these diverse products as their primary business or only handle them occasionally.

Ambiguity over claims can arise where standard policies with different insurers are utilised, so having cover that dovetails across all the main classes of your client's insurance portfolio is a must. Haz-Insure has a single insurer handling all the main classes, and with the support of an experienced claims team, you and your clients can rest assured that the recommendations you have made will meet their demands and needs.

That's why Miles Smith has a reputation for insuring these challenging risks simply and easily with a bespoke scheme designed for these specialist and often complex risk requirements.

We don't just provide insurance...we provide peace of mind!
